

## SuperPole Floor Receptacle System™

An assist pole for care facilities! A portable, floor socket mounted pole for standing and transferring support in institutional (concrete floor) applications.

- In-floor receptacles are installed at each location where transfer support is required. The SuperPole FRS™ is secured into the receptacle by turning the knob on top of the FRS™ pole.
- Excellent standing and transfer support for institutional use where clients needs change frequently - installs & removes in under a minute.
- When not in use, the floor receptacle is sealed with a flush, liquid-tight cap.

## SuperPole Parallel Bar System™

Your key to mobility and independence! A compact parallel bar system, based on the award winning SuperPole System™, for short-term walking therapy.

- Easy to relocate and affordable compared to conventional parallel bar systems.
- Easy setup and removal - SuperPoles™ installed by jackscrew expansion, virtually anywhere there is a floor and ceiling.
- Single Horizontal Rail available as a guide rail for hallways or short walking distances.

Rails are adjustable in height with extra low setting (18" - 40" / 46 - 102 cm) for pediatric applications

## P.T. Rail™

Solid, well located support at your service! The P.T. Rail™ is a unique wall mounted support rail system which promotes safe standing and transfers to and from a toilet. It combines an exceptionally solid feel, and an innovative offset rail design.

- **Safe, Out Of The Way Storage** - our hinged models fold up to store out of the way, yet pulls down in an instant when needed. The smooth "fluid foot" hinge holds its position whenever you leave it - even halfway up - it will not inadvertently fall down causing impact injuries.
- **No Wrist Contact** - unlike vertically aligned dual rail systems, our unique offset rail design allows better use of lower rail ▶
- **Comfort** - generous 1 1/2" (38 mm) diameter rail size for maximum comfort (ADA compliant rail diameter)
- **Options include** - fixed (non-hinged) model, floor mount mount, toilet rail holder, & different rail lengths (28 & 32" / 71 & 81 cm)

Vertical Dual Rails

Offset P.T. Rail

Support on both sides of the toilet
